

Mission Rubber Company Flexible Rubber Couplings

*The World's Only **Green** Couplings*

Flex-Seal® Unshielded Coupling

Flex-Seal® ARC Coupling

No Hub Coupling

HeavyWeight Coupling

Since 1958, Mission Rubber Company has manufactured quality, code approved flexible rubber products for sale into the construction industry for the purpose of connecting, adapting, reducing, repairing or capping almost any type of pipe used in sanitary and drain waste and vent (DWV) applications. 100% of our products are made in the U.S.A., and are sold in the United States and Canada through manufacturers' representatives, and internationally through distributors.

Whether above or below ground, our couplings ensure the integrity of the piping system by offering superior performance by means of features such as a leak-proof sealing, corrosion resistance, and joint movement restraint which provides excellent resistance to heavy earth loads, shear forces, deflection and improved alignment. Our coupling's rubber make-up and rugged construction offer a natural resistance to tension and compression.

Mission Rubber is the only coupling manufacturer to be recognized with environmental certification. Mission Flex-Seal® and HeavyWeight products have been certified as Cradle to Cradle Silver Products by MBDC. The environmental impact of our products, and manufacturing process, have undergone a comprehensive evaluation for their human and environmental health, lifecycle attributes, social responsibility, renewable energy and water stewardship characteristics against stringent certification criteria and are considered ecologically intelligent products.
