Subject: Comment on Composting / AD regs.

Greetings,

My only question/comment on this version of the Title 14 regulations pertains to the In-Vessel AD regulations; Chapter 3.2 Article 6, 17896.56 (a) (2) (A). Why limit on-site composting of digestate to large facilities only? This can be key post-processing step to convert the digestate into a marketable material. Additional operational flexibility at all facilities will help to solve the digestate management challenges these facilities will be faced with.

Thank you for your consideration.

-Juliette Bohn
