**Purpose:** This public information meeting is for any person to learn more about the proposed solid waste facilities permit process and to provide comments to the CIWMB regarding the proposed permit. The meeting is strictly informational and no official decision will be made at the meeting regarding the formal determination on the solid waste facilities permit application.

**Description:** The proposed new permit would consolidate two existing permits into a single permit. Currently, two landfills that are now separately permitted by the local enforcement agencies in the City of Los Angeles and the County of Los Angeles operate at the site. Sunshine Canyon Landfill straddles the boundary between the City of Los Angeles and Los Angeles County. Because of the jurisdictional divide, the landfill is permitted and operated as two separate landfills. This permit proposal would allow the landfill operator to combine the two landfills into a single landfill after the operator obtains any necessary approvals from other public agencies.

For more information, a copy of the permitting documents is available at the Granada Hills Library and the Southern California CIWMB office (located at 320 West 4<sup>th</sup> Street, Suite 670, Los Angeles).
